

# **DigiKomp offers quality components and industry expertise**

**April 30, 2009**

**Anyone deploying self-service ATMs or security applications knows that downtime can be a huge source of extra work, client dissatisfaction, and expensive service calls. DigiKomp, a promising new business at the FSPA show this year, offers expert ATM and security industry knowledge with premium components.**

**As the new, go-to manufacturer's rep for service and quality hardware, DigiKomp offers a variety of high quality power protection, including SurgeX's flat pack system, Minuteman UPS battery back-up units, and ESP's Digital QC Power Filter. DigiKomp has the knowledge of the industry and product application to get you the right power protection for your business. In fact, DigiKomp already works with many outstanding FSPA members and ATM manufacturers.**

**"Investing in the right power protection device in your ATM or security application will save you a lot of dollars wasted on downtime and service calls," says Mike Honkomp, Founder and Vice President of DigiKomp.**

**Mike Honkomp, has been a member in good standing of the FSPA for five years and has a solid background in the ATM and security industry. Look for Mike at the DigiKomp booth (#T-5) on the floor of the FSPA show to see some of the latest new products.**
