

## **TMD Security – CPK + 6000 Series**

**TMD Security, worldwide market leader in Anti Skimming Technology, is pleased to announce that next generation of the Card Protection Kit “ the CPK + 6000 series” will be released in q1 2009.**

**The CPK+ 6000 is the most advanced and reliable technology in anti-skimming solutions ever. Thanks to years of experience, research and interaction with our customers and partners, we succeeded in developing a kit with unique benefits. We not only improved the anti-skimming technology and Surface Detection Technology, we also embedded innovative tools like remote upgrades.**

**The CPK+ 6000 series is a huge step forward in continuing the mission of TMD Security to secure the ATM market against successful skimming attacks.**

**The CPK+ 6000 will be exposed in January at “Wincor World 2009” in Germany. Various models will be showed. TMD Security developed for Wincor Nixdorf, a custom made CPK+ 6000 kit.**

**Summary of the new features of the CPK+ 6000 series:**

- **100% real time communication via USB port**
- **Settings remotely adjustable**
- **Internal clock**
- **New Transmitter**
- **CPK+ and SDK software updates via USB from host (remotely)**
- **Complete integration in ATM / SST network possible**
