# Triton Joins PCI Security Standards Council

*Triton to participate in key standards setting body protecting payment cardholder data*

LONG BEACH, MS — Triton Systems of Delaware, Inc., the company that reset the bar for ATM affordability and performance, has announced that it has joined the PCI Security Standards Council.

As a participating organization, Triton will work with the Council to evolve the PCI Data Security Standard (DSS) and other payment card data protection standards. As a participating organization, Triton will now have access to the latest payment card security standards from the Council, be able to provide feedback on the standards and become part of a growing community that now includes more than 500 organizations. In an era of increasingly sophisticated attacks on systems, adhering to the PCI DSS represents an entity's best protection against data criminals. By joining as a participating organization, Triton is adding its voice to the process.

"Triton is happy to join the ranks of PCI's participating organizations," said Chuck Hayes, Product Development Manager for Triton, who will be representing the ATM manufacturer on the Council. "We look forward to assisting in the development of new security standards to protect the interests of both our customer and the general consumer.

The PCI DSS, endorsed by American Express, Discover Financial Services, JCB International, MasterCard Worldwide and Visa Inc., requires merchants and service providers that store, process or transmit customer payment card data to adhere to information security controls and processes that ensure data integrity.

"The PCI Security Standards Council is committed to helping everyone involved in the payment chain protect consumer payment data," said Bob Russo, general manager of the PCI DSS. "By participating in the standards setting process, Triton demonstrates they are playing an active part in this important end goal."

More information on the council and the standard can be found at [www.pcisecuritystandards.org](http://www.pcisecuritystandards.org)
